Some Answers to Frequently Asked Questions About NMT.

Q) Can you give some examples of actual health conditions you have treated and approximately how many sessions it took for the patient to see dramatic relief?

**** 3yr. old male.** Severe respiratory allergies since birth, anaphylactic reaction to peanut requiring recussitation in ER on two occasions, the first with onset 40 min. post exposure, the second 20 min. Treated twice. Allergy meds withdrawn for one week. No respiratory allergy symptoms. Third visit tested -ve to peanut, given peanut to eat with no reaction in 45 min. (epi-kit in office). This case will be one presented on digital video at seminar.

**** 42 yr old male grain farmer** with severe grain/hay dust, pollen allergies since age 10, chronic mid D and C pain x 8 yr. Allergies completely resolved in 3 visits. All spinal complaints resolved without manipulation, or modalities in 2 visits. This case will be presented also.

**** 6 cases of plantar fasciitis** of 3 mo to 5 yr duration all resolved within 3 visits with NMT.

**** 72 yr. old female** with chronic pain, and inflammation of knee and severe arthritic DJD resolved in 3 weeks (6 visits).

**** 73 yr. old female** with macular degeneration x 5 yr with central blindness in R eye x 2 1/2 yr. Ophthalmologist treated L eye only, presuming R eye beyond help. MD exam 3 mo ago showed fresh bleeding in R retina. Treated with NMT 5 visits since then. At 3 visits no evidence of bleeding on MD re-exam and able to recognize faces with R central vision. At 4 visits able to read large headline print in newspaper, at 5 visits able to view TV at 6 feet distance.

I could go on; but you get the idea. These results are routine.

Q) How many patients in each health condition category have you treated using NMT?

**** Many.** Treating 7 MS patients currently with excellent improvement in mobility, reduced rigidity, better control, better energy levels. Arthritics, Fibromyalgia patients resolve very quickly. Allergy patients of the most severe sort are released within 2-6 visits.

Q) I see a lot of cases with chronic structural problems (eg. frozen shoulder, TOS, carpal tunnel, lower back problems resistant to chiropractic etc. not necessary with an auto-immune origin, so I was wondering how NMT fares with structural cases?

**** I rarely do manipulation, or therapies now.** Chronic shoulders, hips, tendonitis cases resolve in 2-4 visits, even after failed conventional treatment of years duration.

Q) Could you briefly explain your Treatment Philosophy?

I want to treat with methods grounded in science without giving up the kind of care that restores the body's innate health in a natural way.

Always I try to follow the path of simplicity, both in my treatment sessions, and as homework for the patient.

My other tenet is "less is more", and under this broad umbrella, I am always drawn to healing modalities that necessitate the least number of treatment sessions.

My belief is that the complexity of a scientific theory, and of a therapeutic technique is inversely proportional to the degree to which the purveyor of that theory or technique truly understands what they are talking about. Stephen Wolfram in his new book, "A New Kind of Science" makes it very clear that complex phenomena in the universe can be explained with very simple rules. That applies to human health as well.

Leslie S. Feinberg, D.C.
